INFORMATION AND SOFTWARE TECHNOLOGY

Index to Volume 38 (1996)

Number 1 (January) pp 1–64
Number 2 (February) pp 65–128
Number 3 (March) pp 129–256
Number 4 (April) pp 257–310
Number 5 (May) pp 311–376
Number 6 (June) pp 377–440
Number 7 (July) pp 441–496
Number 8 (August) pp 497–552
Number 9 (September) pp 553–612
Number 10 (October) pp 613–668
Number 11 (November) pp 669–732
Number 12 (December) pp 733–800

Article index

Number 1

Modelling the semantics of multitasking facilities in Concurrent C using Petri nets
A. Boujarwah, K. Saleh, N. Al-Seif 3

The processing strategy for the NF^2 relational frc-interface
T. Niemi, K. Järvelin 11

A method to remove variations in source codes
N. Hattori, N. Ishii 25

A closer look at programming expertise: critical survey of some methodological issues
P. Návrat 37

Object-oriented systems: a cross-discipline overview
O. Díaz 47

Number 2

Expert judgement as an estimating method
R.T. Hughes 67

Read this and change the way you feel about software engineering
J. Low, J. Johnson, P. Hall, F. Hovenden, J. Rachel, H. Robinson, S. Woolgar 77

Using timed CSP during object-oriented design of real-time systems
P.G. O'Donaghue, M.E.C. Hull 89

DITSE: an experimental distributed database system
C.-Y. Ni, S.-M. Yuan 103

The automatic generation of test cases for optimizing Fortran compilers
C.J. Burgess, M. Saidi 111

Priority inheritance protocol in Ada 95
J. Abu-Ras 121

Number 3

Beyond software factories: concurrent-development process and an evolution of software process technology in Japan
M. Aoyama 133

Software products evaluation system: quality models, metrics and process - International standards and Japanese practice
M. Azuma 145

Quantitative analytic approaches in software engineering
K. Torii, K. Matsumoto 155

Software reuse in Japan
S. Isoda 165

The software quark model: a universal model for CASE repositories
T. Ajisaka 173

MENDELS ZONE: A parallel program development system based on formal specifications
S. Honiden, A. Ohsuga, N. Uchihura 181

Knowledge-based cognitive support for multimedia information design
K. Nakakoji, A. Aoki, B.N. Reeves 191

IntelligentPad as meme media and its application to multimedia databases
Y. Tanaka 201

GUNGEN: groupware for a new idea generation support system
J. Munemori, Y. Hagasawa 213

Computer-supported meeting environment for collaborative software development
E. Kuwana, E. Yana, Y. Sakamoto, Y. Nakamura, K. Horikawa 221

Software technologies created in Japan
T. Takeshita 229

The TRON project
K. Sakamura 239

Number 4

Evolution and issues in metaCASE
S. Kelly, K. Smolander 261

Method engineering for multi-perspective software development
B. Nuseibeh, A. Finkelstein, J. Kramer 267

Method engineering: engineering of information systems development methods and tools
S. Brinkkemper 275

Ontology as a foundation for meta-modelling and method engineering
Y. Wand 281

Functionality and architecture of PSEEs
A. Fuggetta 289

The MEMA-model: towards a new approach for method engineering
T. Punter, K. Lemmen 295

Number 5

Challenges in the successful transfer of formal methods technology into

industrial applications
H. Saiedian, M.G. Hinchey 313
An exercise in modelling
D. Andrews 323
Repositories for co-operative information systems
H. Wang 333
Generating test data for distributed software using the chaining approach
R. Ferguson, B. Korel 343
Model-based support for business re-engineering
S. Jarzabek, T.W. Ling 355

Number 6
Communications software reverse engineering: a semi-automatic approach
K. Saleh, A. Boujarwah 379
Estimating CASE development size from outline specifications
S. Cockcroft 391
Communicating X-machines
J. Barnard, J. Whitworth, M. Woodward 401
Exploiting object-oriented methods for multi-modal trip planning systems
J.E. McCormack, S.A. Roberts 409
An executable specification language for specification understanding in object-oriented specification reuse
S.-C. Chou, J.-Y. Chen, C.-G. Chung 419

Number 7
An evaluation of code metrics for object-oriented programs
R. Harrison, L.G. Samaraweera, M.R. Dobie, P.H. Lewis 443
Sharing objects as structural defects in object-oriented programming without safe typing
D. Rine 451
A comparison of ORN to other declarative schemes for specifying relationship semantics
B.K. Ehlmann, G.A. Riccardi 455
Migration from relational to object-oriented databases
S. Monk, J.A. Mariani, B. Elgalal, H. Campbell 467
Programmers' performance on structured versus nonstructured function definitions
K.G. van den Berg, P.M. van den Broek 477

Number 8
Object-oriented design: exception handling and copying
D.C. Rine 499
Wavefront: a goal-driven requirements process model
M.F. Theofanos, S.L. Pfleeger 507
A mixed approach for the formal correctness proof of distributed programs
G. Manduchi 521
Concurrent object-oriented programming using term graph rewriting techniques
G.A. Papadopoulos 539

Number 9
A new approach to ADT specification support based on reuse of similar ADT by the application of Case-Based Reasoning
P. Termsinsuwan, Z. Cheng, N. Shiratori 555
An efficient process migration algorithm for homogeneous clusters
K.H. Al-Saqabi, K.A. Saleh 569
Performance of a two-phase commit protocol
B.C. Desai, B.S. Boutros 581
Extending classical functional dependencies for physical database design
T.W. Ling, C.H. Goh, M.L. Lee 601

Number 10
Using joint application design to develop readable formal specifications
R.B. Jackson, D.W. Embley 615
Replicated servers for fault-tolerant real-time systems using transputers
A. Sinha, P.K. Das, D. Basu 633
Issues in co-operative software engineering using globally distributed teams
I. Gorton, S. Motwani 647
Behavioural modelling in object-oriented methodology
P.K.O. Chow, D.S. Yeung 657

Number 11
Software evolution: past, present and future
K. Bennett 673
Feedback in the software evolution process
M.M. Lehman 681
Software faults, software failures and software reliability modelling
J.C. Munson 687
A method for application management maturity assessment
R.M. Hather, E.L. Burd, C. Boldyreff 701
Improving reverse engineering models with test-case related knowledge
P. Benedusi 711
Is modularization always a good idea?
L. Hatton 719
Software evolution management: a process-oriented perspective
D.S. Hinley 723

Number 12
Requirements specification of real-time systems: temporal parameters and timing-constraints
T.G. Kirner, A.M. Davis 735
Prototyping: some new results
N. Cerpa, J. Verner 743
Integrated Estelle and ASN.1 specification approach to automatic implementation of application protocol
R. Lai, A. Lo 757
Proportional sampling strategy: guidelines for software testing practitioners
F.T. Chan, T.Y. Chen, I.K. Mak, Y.T. Yu 775
Australian managers' perceptions, attitudes and use of information technology
G.J. O'Brien, W.D. Wilde 783

Keyword Index

Abstraction
generalization, meta-levels, programming knowledge, development method 37
specification, model, mathematics 323
Actor systems
object-oriented modelling, class-based systems, frame-based systems, terminological systems, semanitc data models 47
ADT
FDT, LOTOS, specification of communication protocols, communication software 555
Algebraic specification
parallel programs, temporal logic 181
Alternating bit protocol
X-machines, communicating X-machines, communication, ports 401
Application protocols
Estelle, ASN.1, endcoding/decoding, data abstraction, EASE 757
ASN.1
Estelle, application protocols, endcoding/decoding, data abstraction, EASE 757
Assertional reasoning
distributed systems, petri nets 521
Assessment
software maintenance, process maturity 701
Atomic broadcast
ault-tolerance, replication, state-machine, digital signatures, transputers 633

Automated analysis
systems analysis methodologies, *system modelling, ontology, meta-*modelling 281
Automated testing
test cases, compiler testing 111

Behavioural model
object-oriented methodology 657
Business modelling tool
business re-engineering, conceptual model 355
Business re-engineering
conceptual model, business *modelling tool 355*

CASE
Computer-aided software *engineering, CASE application* products, size measurement, size *estimation, software process* modelling 391 *domain analysis, software* reuse 165 *metaCASE 261* software process, software *development, process model,* PSEE 289
CASE application products
computer-aided software *engineering, CASE, size* measurement, size estimation, *software process modelling* 391
CASE repository
data integration, tool interconnection, software design 173
Chaining
software development, distributed programs, test data generators 343
Change management
software maintenance, process improvement 723
Chat
groupware, idea generation support system, distributed environments, KJ method 213
Class-based systems
object-oriented modelling, frame-based systems, terminological systems, actor systems, semanitc data models 47
Client-server
transaction, DBMS, concurrency control, SQL 103
COGENT
collaborative software development, computer-supported meeting environment, design model 221
Collaborative software development
computer-supported meeting *environment, design model,* COGENT 221
Communicating X-machines
X-machines, communication, ports, *alternating bit protocol 401*
Communication
X-machines, communicating X-machines, ports, alternating bit *protocol 401*
Communication software
ADT, FDT, LOTOS, specification of communication protocols 555 *Communications software* engineering *Estelle, reverse engineering,* tools 379
Compiler testing
automated testing, test cases 111
Comprehensibility
structured programming, functional *programming, software* metrics 477
Computer-aided software engineering
CASE, CASE application products, *size measurement, size* estimation, software process *modelling* 391
Computer architecture
real-time operating system, microprocessor, computer *augmented environment, distributed* system, human machine interface 239
Computer augmented environment
computer architecture, real-time operating system, microprocessor, distributed system, human machine interface 239
Computer-supported meeting environment
collaborative software development, design model, COGENT 221
Conceptual modelling
business re-engineering, business modelling tool 355
Concurrency control
distributed database management systems (DDBMS), *performance* study of two-phase commit protocol (2PC) 581 transaction, DBMS, SQL, client-server 103
Concurrent C
concurrent programming, multitasking, petri nets, real-time systems, semantics 3
Concurrent object-oriented programming
term graph rewriting systems (TGRS), implementation techniques, Dactl 539
Concurrent programming
concurrent C, multitasking, petri *nets, real-time systems, semantics 3*
Contingency approach
method engineering, modelling strategy 295
Co-operative information systems information repository, information *system architecture 333*
Copying
object-oriented development, exception handling, software reuse, *corrective maintenance, software* component integration, *invariants 499*
Corrective maintenance
object-oriented development, exception handling, copying, *software reuse, software* component integration, *invariants 499*

Dactl
concurrent object-oriented *programming, term graph rewriting* systems (TGRS), implementation *techniques 539*
Data abstraction
Estelle,ASN.1, application protocols, endcoding/decoding, EASE 757
Data integration
CASE repository, tool inter-*connection, software design 173*
Database design
functional dependencies, normal forms 601
Database migration
schema migration, schema *transformation 467*
DBMS
transaction, concurrency control, SQL, client-server 103
Design model
collaborative software development, *computer-supported meeting* environment, COGENT 221
Design quality
modularization, reliability 719
Design theories
multimedia authoring, knowledge-*based cognitive support* 191
Development method
abstraction, *generalization, meta-*levels, programming knowledge 37
Digital signatures
*fault-tolerance, replication, state-*machine, atomic broadcast, *transputers* 633

Discourse analysis
postmodernism, software engineering, ethnography 77
Distributed database management systems (DDBMS)
performance study of two-phase commit protocol (2PC), concurrency control 581
Distributed environments
groupware, idea generation support system, KJ method, chat 213
Distributed programs
software development, test data generators, chaining
Distributed system
computer architecture, real-time operating system, microprocessor, computer augmented environment, human machine interface 239
Distributed systems
petri nets, assertional reasoning 521
Distribution systems
process migration, homogeneous clusters, parallel processing 569
Domain analysis
CASE, software reuse 165
Dynamic program complexity
software reliability, software design, software complexity, software measurement, software faults, software failures 687

EASE
Estelle, ASN.1, application protocols, endcoding/decoding, data abstraction 757
Education
formal methods, marketing, simulation, training, reusable framework 313
Endcoding/decoding
Estelle, ASN.1, application protocols, data abstraction, EASE 757
Estelle
ASN.1, application protocols, endcoding/decoding, data abstraction, EASE 757
communications software engineering, reverse engineering, tools 379
Ethnography
postmodernism, software engineering, discourse analysis 77
Exception handling
object-oriented development, copying, software reuse, corrective maintenance,software component integration, invariants 499
Executable specification language
specification reuse, specification behaviour 419

Fault-tolerance
replication, state-machine, atomic broadcast, digital signatures, transputers 633
FDT
ADT, LOTOS, specification of communication protocols, communication software 555
FEAST
software process, process improvement, feedback systems 681
Feedback systems
software process, process improvement, FEAST 681
Formal methods
marketing, simulation, training, education, reusable framework 313
Frame-based systems
object-oriented modelling, class-based systems, terminological systems, actor systems, semanitc data models 47
Functional dependencies
database design, normal forms 601
Functional programming
structured programming, software metrics, comprehensibility 477

Generalization
abstraction, meta-levels, programming knowledge, development method 37
Goals/questions/metrics
software process, process models, requirements, wavefront requirements process 507
Groupware
idea generation support system, distributed environments, KJ method, chat 213

Homogeneous clusters
process migration, distributed systems, parallel processing 569
Human machine interface
computer architecture, real-time operating system, microprocessor, computer augmented environment, distributed system 239

Idea generation support system
groupware, distributed environments, KJ method, chat 213
Implementation techniques
concurrent object-oriented programming, term graph rewriting systems (TGRS), Dactl 539
Information repository
co-operative information systems, information system architecture 333
Information system architecture
co-operative information systems, information repository 333
Information systems development methods
information systems research, method engineering, situational methods 275
Information systems research
method engineering, information systems development methods, situational methods 275
Internal attributes
quantifying quality, object-oriented languages 443
Invariants
object-oriented development, exception handling, copying, software reuse, corrective maintenance,software component integration 499
IT barriers
management, training and eduction 783

Japan
review and perspective, software technologies 229
Joint application design
requirements specifications, rapid prototyping 615

KJ method
groupware, idea generation support system, distributed environments, chat 213
Knowledge-based cognitive support multimedia authoring, design theories#191
Knowledge sources
reverse engineering, software testing 711

Logic programming
NF^2 relational model, user interface, query processing, prolog-based knowledge representation 11
LOTOS
ADT, FDT, specification of communication protocols, communication software 555

Management
training and eduction, IT barriers 783
Marketing
formal methods, simulation, training, education, reusable framework 313
MASCOT
object modelling, timed CSP, object-oriented 89
Mathematics
specification, model, abstraction 323
Measurement environment
quantitative analysis, software metrics 155
Media architecture
object-oriented system, multimedia database 201
MetaCASE
CASE 261
viewpoints, method integration, method engineering 267
Meta-levels
abstraction, generalization, programming knowledge, development method 37
Meta-modelling
systems analysis methodologies, system modelling, ontology, automated analysis 281
Method engineering
contingency approach, modelling strategy 295
information systems research, information systems development methods, situational methods 275
viewpoints, method integration, metaCASE 267
Method integration
viewpoints, metaCASE, method engineering 267
Microprocessor
computer architecture, real-time operating system, computer augmented environment, distributed system, human machine interface 239
Model
specification, abstraction, mathematics 323
Modelling strategy
method engineering, contingency approach 295
Modularization
design quality, reliability 719
Multimedia authoring
design theories, knowledge-based cognitive support 191
Multimedia database
media architecture, object-oriented system 201
Multi-modal transportation
object-oriented databases, object-oriented modelling, trip planning, route planning 409
Multitasking
concurrent C, concurrent programming, petri nets, real-time systems, semantics 3

NF^2 relational model
user interface, query processing, logic programming, prolog-based knowledge representation 11
Normal forms
database design, functional dependencies 601

Object database management systems
object relationship notation (ORN), object-oriented data modelling 455
Object modelling
MASCOT, timed CSP, object-oriented 89
Object-oriented
object modelling, MASCOT, timed CSP 89
Object-oriented data modelling
object relationship notation (ORN), object database management systems 455
Object-oriented databases
object-oriented modelling, trip planning, route planning, multi-modal transportation 409
Object-oriented development
exception handling, copying, software reuse, corrective maintenance,software component integration, invariants 499
Object-oriented languages
quantifying quality, internal attributes 443
Object-oriented methodology
behavioural model 657
Object-oriented modelling
class-based systems, frame-based systems, terminological systems, actor systems, semanitc data models 47
object-oriented databases, trip planning, route planning, multi-modal transportation 409
Object-oriented programming
object sharing, structural defects, security 451
Object-oriented system
media architecture, multimedia database 201
Object relationship notation (ORN)
object-oriented data modelling, object database management systems 455
Object sharing
object-oriented programming, structural defects, security 451
Ontology
systems analysis methodologies, system modelling,meta-modelling, automated analysis 281

Parallel processing
process migration, distributed systems, homogeneous clusters 569
Parallel programs
algebraic specification, temporal logic 181
Partition testing
random testing, selection of test data 775
Performance study of two-phase commit protocol (2PC) distributed database management systems (DDBMS), concurrency control 581
Petri nets
concurrent C, concurrent programming, multitasking, real-time systems, semantics 3
distributed systems, assertional reasoning 521
Ports
X-machines, communicating X-machines, communication, alternating bit protocol 401
Postmodernism
software engineering, ethnography, discourse analysis 77
Priority inheritance
priority inversion, real-time systems 121
Priority inversion
priority inheritance, real-time systems 121
Process improvement
software maintenance, change management 723
software process, feedback systems, FEAST 681
Process maturity
software maintenance, assessment 701
Process migration
distributed systems, homogeneous clusters, parallel processing 569
Process model
CASE, software process, software development, PSEE 289
Process models
software process, requirements, wavefront requirements process, goals/questions/metrics 507
Product evaluation
quality evaluation, quality metrics,

software measurement, software metrics, software quality 145
Programming knowledge
abstraction, generalization, meta-levels, development method 37
Prolog-based knowledge representation
NF^2 relational model, user interface, query processing, logic programming 11
Prototyping
waterfall approach, software development approaches 743
PSEE
CASE, software process, software development, process model 289

Quality evaluation
product evaluation, quality metrics, software measurement, software metrics, software quality 145
Quality metrics
product evaluation, quality evaluation, software measurement, software metrics, software quality 145
Quantifying quality
object-oriented languages, internal attributes 443
Quantitative analysis
software metrics, measurement environment 155
Query processing
NF^2 relational model, user interface, logic programming, prolog-based knowledge representation 11

Random testing
partition testing, selection of test data 775
Rapid prototyping
requirements specifications, joint application design 615
Real-time operating system
computer architecture, microprocessor, computer augmented environment, distributed system, human machine interface 239
Real-time systems
concurrent C, concurrent programming, multitasking, petri nets, semantics 3
priority inversion, priority inheritance 121
requirements specifications, timing-constraints 735
Re-engineering
software maintenance, software evolution 673
Reliability
modularization, design quality 719
Replication
fault-tolerance, state-machine, atomic broadcast, digital signatures, transputers 633
Requirements
software process, process models, wavefront requirements process, goals/questions/metrics 507
Requirements specifications
joint application design, rapid prototyping 615
real-time systems, timing-constraints 735
Reusable framework
formal methods, marketing, simulation, training, education 313
Reverse engineering
communications software engineering, Estelle, tools 379
software testing, knowledge sources 711
Review and perspective
software technologies, Japan 229
Rewriting
variation removal, source code 25
Route planning
object-oriented databases, object-oriented modelling, trip planning, multi-modal transportation 409

Schema migration
schema transformation, database migration 467
Schema transformation
schema migration, database migration 467
Security
object-oriented programming, object sharing, structural defects 451
Selection of test data
partition testing, random testing 775
Semantic data models
object-oriented modelling, class-based systems, frame-based systems, terminological systems, actor systems 47
Semantics
concurrent C, concurrent programming, multitasking, petri nets, real-time systems 3
Shift work
software development, virtual teams 647
Simulation
formal methods, marketing, training, education, reusable framework 313
Situational methods
information systems research, method engineering, information systems development methods 275
Size estimation
computer-aided software engineering, CASE, CASE application products, size measurement, software process modelling 391
Size measurement
computer-aided software engineering, CASE, CASE application products, size estimation, software process modelling 391
Software complexity
software reliability, software design, software measurement, software faults, software failures, dynamic program complexity 687
Software component integration
object-oriented development, exception handling, copying, software reuse, corrective invariants 499
Software design
CASE repository, data integration, tool interconnection 173
software reliability, software complexity, software measurement, software faults, software failures, dynamic program complexity 687
Software development
CASE, software process, process model, PSEE 289
distributed programs, test data generators, chaining 343
shift work, virtual teams 647
Software development approaches
prototyping, waterfall approach 743
Software development environment
software process, software development management 133
Software development management
software process, software development environment 133
Software engineering
postmodernism, ethnography, discourse analysis 77
Software estimation
software maintenance 67
Software evolution
software maintenance, re-engineering 673
Software failures
software reliability, software design, software complexity, software measurement, software faults, dynamic program complexity 687

Software faults
software reliability, software design, software complexity, software measurement, software failures, dynamic program complexity 687
Software maintenance
change management, process improvement 723
process maturity, assessment 701
software estimation 67
software evolution, re-engineering 673
Software measurement
product evaluation, quality evaluation, quality metrics, software metrics, software quality 145
software reliability, software design, software complexity, software faults, software failures, dynamic program complexity 687
Software metrics
product evaluation, quality evaluation, quality metrics, software measurement, software quality 145
quantitative analysis, measurement environment 155
structured programming, functional programming, comprehensibility#477
Software process
CASE, software development, process model, PSEE 289
software development management, software development environment 133
process models, requirements, wavefront requirements process, goals/questions/metrics 507
process improvement, feedback systems, FEAST 681
Software process modelling
computer-aided software engineering, CASE, CASE application products, size measurement, size estimation 391
Software quality
product evaluation, quality evaluation, quality metrics, software measurement, software metrics 145
Software reliability
software design, software complexity, software measurement, software faults, software failures, dynamic program complexity 687
Software reuse
CASE, Domain analysis 165
object-oriented development, exception handling, copying, corrective maintenance, software component integration, invariants 499
Software technologies
review and perspective, Japan 229
Software testing
reverse engineering, knowledge sources 711
Source code
variation removal, rewriting 25
Specification
model, abstraction, mathematics 323
Specification behaviour
specification reuse, executable specification language 419
Specification of communication protocols
ADT, FDT, LOTOS, specification of communication protocols, communication software 555
Specification reuse
specification behaviour, executable specification language 419
SQL
transaction, DBMS, concurrency control, client-server 103
State-machine
fault-tolerance, replication, atomic broadcast, digital signatures, transputers 633
Structural defects
object-oriented programming, object sharing, security 451
Structured programming
functional programming, software metrics, comprehensibility 477
System modelling
systems analysis methodologies, ontology, meta-modelling, automated analysis 281
Systems analysis methodologies
system modelling, ontology, meta-modelling, automated analysis 281

Temporal logic
parallel programs, algebraic specification 181
Term graph rewriting systems (TGRS)
concurrent object-oriented programming, implementation techniques, Dactl 539
Terminological systems
object-oriented modelling, class-based systems, frame-based systems, actor systems, semanitc data models 47
Test cases
automated testing, compiler testing 111
Test data generators
software development, distributed programs, chaining 343
Timed CSP
object modelling, MASCOT, object-oriented 89
Timing-constraints
real-time systems, requirements specifications 735
Tool interconnection
CASE repository, data integration, software design 173
Tools
communications software engineering, Estelle, reverse engineering 379
Training
formal methods, marketing, simulation, education, reusable framework 313
Training and education
management, IT barriers 783
Transaction
DBMS, concurrency control, SQL, client-server 103
Transputers
fault-tolerance, replication, state-machine, atomic broadcast, digital signatures 633
Trip planning
object-oriented databases, object-oriented modelling, route planning, multi-modal transportation 409

User interface
NF^2 relational model, query processing, logic programming, prolog-based knowledge representation 11

Variation removal
source code, rewriting 25
Viewpoints
method integration, metaCASE, method engineering 267
Virtual teams
software development, shift work 647

Waterfall approach
prototyping, software development approaches 743
Wavefront requirements process
software process, process models, process, goals/questions/metrics 507

X-machines
communicating X-machines, communication, ports, alternating bit protocol 401
